Legg Mason ClearBridge Tactical Dividend Income Fund

Class A Euro Distributing (M) (Hedged) Plus (e)

ISIN: IE00B9782Q97

A sub-fund of: Legg Mason Global Funds plc.

Objectives and Investment Policy

Objective

The fund's main goal is to provide a high level of income. Achieving growth of the fund's value in the long term is a secondary goal.

Investment Policy

- The fund will invest in shares of companies, which are expected to generate income through dividends or other distributions.
- The fund will invest at least half of its assets in companies located in the US. The fund's remaining assets may be invested in companies located anywhere in the world, including emerging market countries.
- The fund may invest up to 20% of its assets in debt instruments.
- The fund may invest in master-limited partnerships ("MLPs"), which are entities that typically generate income through exploring, developing or transporting natural resources. The fund may also invest in real estate investment trusts ("REITs").

Share Class Policy

- For this share class certain fees and expenses may be charged to capital rather than income. This will result in an increase in income

available for distribution by foregoing some of the capital that the share class would have available for future investment and potential growth. In addition, all or some portion, of realised and unrealised capital gains net of realised and unrealised capital losses may be declared as a dividend.

Manager's Discretion: The fund manager has discretion in selecting investments within the fund's objective and investment policies.

Fund's Base Currency: US Dollar

Share Class Currency: Euro

Transaction Costs: The fund bears costs in buying and selling investments, which may have a material impact on the fund's performance.

Dealing Frequency: You can buy, sell and switch your shares on each day that the New York Stock Exchange is open for business.

Minimum Initial Investment: For this share class the minimum initial investment is EUR 1,000.

Treatment of Income: For this share class all, or some portion of, net income is declared and paid monthly to shareholders.

Risk and Reward Profile

The indicator is based on the volatility of the returns (past performance) of the reported share class (calculated on a 5 year rolling return basis). Where a share class is inactive / has less than 5 years of returns, the returns of a representative benchmark are used.

There is no guarantee that the fund will remain in the indicator category shown above and the categorisation of the fund may shift over time. Historical data, which is used in calculating the indicator, may not be a reliable indicator of the future risk profile of this fund.

The lowest category does not mean a risk-free investment.

The fund does not offer any capital guarantee or protection and you may not get back the amount invested.

The fund is in its risk/reward category because investments in shares of companies from various countries and sectors have historically been subject to relatively large fluctuations in value.

The fund is subject to the following risks which are materially relevant but may not be adequately captured by the indicator:

Investment in company shares: The fund invests in shares of companies, and the value of these shares can be negatively affected by changes in the company, its industry or the economy in which it operates.

Emerging markets investment: The fund may invest in the markets of countries which are smaller, less developed and regulated, and more volatile than the markets of more developed countries.

Master-limited Partnerships: The fund may invest in or have exposure to MLPs, which may offer fewer protections to investors

than investments in corporations. MLPs may be difficult to sell quickly and subject to volatile price movements. Any change in the tax treatment of MLPs could cause a significant drop in the value of MLP investments.

Real Estate Investment Trusts: Investment in REITs poses similar risks as investing directly in real estate, including changing values, tax rules and other laws. The value of investments in REITs and the level of cash flow generated for distributions to investors may be affected by defaults by borrowers and tenants. The value of US REITs may be affected if the REIT fails to qualify for preferential treatment under US tax rules and securities laws.

Fund currency: Changes in exchange rates between the currencies of investments held by the fund and the fund's base currency may negatively affect the value of an investment and any income received from it.

Fund operations: The fund is subject to the risk of loss resulting from inadequate or failed internal processes, people or systems or those of third parties such as those responsible for the custody of its assets, especially to the extent that it invests in developing countries.

Hedged class currency: The value of your investment may fall due to changes in the exchange rate between the currency of your share class and the base currency of the fund. Efforts will be made to try to protect the value of your investment against such changes, but such efforts may not succeed.

Charges from capital: Fees and expenses of this share class may be charged to the capital of the share class rather than its income. This policy will result in an increase in income available for distribution to investors. However, this will forego some of the capital that the share class has available for future investment and potential growth.

For further explanation on the risks associated with an investment in the fund, please refer to the section entitled "Risk Factors" in the base prospectus and "Primary Risks" in the fund supplement.

Charges

One-off charges taken before or after you invest	
Entry charge	5.00%
Exit charge	none
This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).	
Charges taken from the fund over a year	
Ongoing charge	1.75%
Charges taken from the fund under certain specific conditions	
Performance fee	none

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

Entry and exit charges shown are the maximum that might be taken out of your money. In some cases, you might pay less and you should speak to your financial adviser about this.

The ongoing charge is based on expenses for the 12 month period ending December 2018. This figure may vary over time.

For more information about charges, please see the "Fees and Expenses" sections of the base prospectus and fund supplement.

Past Performance

The fund was launched on 3 June 2013 and the share class began issuing shares on 27 February 2014.

Past performance has been calculated in EUR.

The performance reflects all fees and charges payable by the fund but does not reflect any entry or exit charge that might be payable. For performance purposes only, any distributed income (without the deduction of any locally applied taxes) has been reinvested.

Past performance is no guide to future returns and may not be repeated.
